SHAW'S
MEDICAL PRACTITIONER'S
REGISTER

OF
CASES ATTENDED IN PRIVATE PRACTICE.

BY
S. SCOTT ALISON, Esq. M. D.
LICENTIATE OF THE ROYAL COLLEGE OF PHYSICIANS, LONDON,

AND
WM. CUNNINGHAM GLEN, Esq.
OF THE POOR LAW BOARD.

London :

SHAW AND SONS, FETTER LANE,

PRINTERS AND PUBLISHERS OF THE BOOKS AND FORMS OF THE POOR LAW BOARD,
TITHE COMMISSION, FACTORY INSPECTORS, COMMISSIONERS IN LUNACY, &c. ; COUNTY COURTS,
FRIENDLY SOCIETIES, AND SAVINGS BANKS BOOKS AND FORMS (by Authority).

~~H. O (2)~~

ADVERTISEMENT.

HITHERTO too little care has been taken by the majority of Medical Men to preserve in a methodical arrangement records of their cases; and to many it has been a subject of deep regret, that they have found themselves at an after period unable to refer to authentic data in support of the opinions they may have formed in regard to the causes which gave rise to particular forms of disease, the circumstances under which particular diseases appeared, the treatment which was adopted in any particular case, and in respect to many other points highly important in Medical Science. To the Practitioner who desires to contribute his individual experience towards the general stock of Medical knowledge it is unnecessary to dwell upon the importance of his keeping a faithful record of his cases. When supported by the indisputable facts recorded in his register, the scientific observer can then point with precision to the circumstances attendant upon the manifestation of disease, the external agencies associated with it, the means whereby its progress was arrested, and many other points of great importance. Such a record will form a highly valuable body of evidence connected with the natural history of disease and the science and practice of Medicine. It will confer the means of deciding questions by the numerical method, in many instances the only true and unequivocal arbiter, and contribute the materials for elevating Medicine to the rank of an exact Science. Moreover, the great importance which is now attached to the sanitary condition of the people of this country, and to all questions affecting public health, renders it important that Medical Men should keep faithful, if only concise, records of the cases of disease which come before them professionally, so that they may be enabled to trace, not only the causes and progress of disease in their own particular localities, but also to assist in the advancement of Medical Science by promulgating the results of their individual experience amongst their professional brethren. It is with a view to facilitate the keeping of such a record, without encroaching too much upon the time devoted to the practice of a laborious profession, that the present Register is submitted to the Medical Profession, in the confident hope that it will be found to embrace the leading features and points of importance requiring to be noted in each case.

It has been considered unnecessary to give examples of the mode of keeping the Register, as the facts which ought to be recorded in the progress of each case must be obvious to every enlightened Practitioner; and it will be seen that the Register can be used for recording every case, of whatever nature, which may be attended.

To facilitate reference, an Index for the Names of Patients and an Alphabetical Index of Diseases and Symptoms have been added.
